

## How to Clean the Espresso Machine:

Make sure that the Espresso Machine is cleaned every night. Never turn the machine off. Refer to Image on the next page if you are unsure of the terminology.

1. Remove and rinse the **Portafilter**
2. Using the **Cleaning Brush** clean the **Group Head**
3. Take a small scoop (using the other side of the **Cleaning Brush**) of **Cleaning Detergent** and dump it in the cleaning **Portafilter**. Place the cleaning **Portafilter** back on the **Group Head**
4. Press the **Manual Button** for 10 seconds, then turn off.

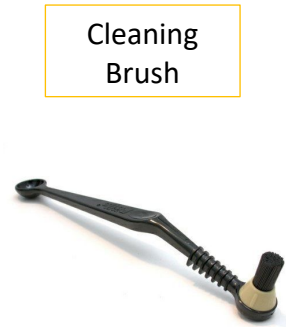

*Repeat this step 5 times*

5. Remove the cleaning **Portafilter** and rinse with water. Attach the regular **Portafilter** to the **Group Head** and manually rinse water through the machine for 10 seconds

*Repeat this step 5 times*

6. Get a clean cup and press the espresso button (**Single** for the single **Portafilter** and **Double** for the double **Porta Filter**). Look at the water if there are bubbles
  - a. If there are bubbles rinse more water through the machine.
  - b. If there are no bubbles then the machine is clean.
7. Repeat steps #1-6 on the other side
8. Remove the **Drip Tray** and clean by hand.

**DO NOT USE THE MACHINE ONCE IT IS CLEANED, IT HAS TO REMAIN CLEAN FOR THE MORNING**
